

Sexual Abuse

We know that there are many in our body and community who have experienced abuse. Both men and women have abuse as part of their story, and we want to acknowledge the pain it has caused and the need for care. If you or someone you care for is an abuse survivor, or if you are just beginning to understand that you were abused, we want to assist in any way we can from the reporting of abuse through the continual healing journey. We would consider it a great privilege if you choose to invite us in to listen and allow us to walk with you.
